

- Can you explain what you understand about the **responsibilities and goals** of the position you are applying for
- What past **volunteering experiences** do you have, either within IEEE or outside, and what did you learn from them?
- **Why should we choose you over other candidates applying for this position?**
- **IDEAS:** Share one innovative event or initiative you would like to introduce for the chapter and explain how you would execute it.

WIC

- **In your perspective, why does the Women in Computing (WiC) role exist in our student branch, and what impact should it ideally create**

Chair or vice chair

- What past **volunteering experiences** do you have, either within IEEE or outside, and what did you learn from them?
- Describe a situation where you had to lead a group. How did you handle it, and what was the outcome?

Gauri J

- Can you briefly explain the core problem that SafeTrail solves and what motivated you to work on it
- What technologies, algorithms, or data sources did you use to determine which routes were well-lit and low-risk?
- How did you process real-time safety data and integrate it into route recommendations?

Vidya

- How does your platform ensure trust and authenticity between sellers and buyers?
- If you were to scale this project further, what features or technologies would you add?
- How did you integrate different modules like task management, Pomodoro timer, timetable generation, and productivity analytics within a single Java

Swing application? Can you describe the architecture?

- Did you build each feature separately and then combine them, or did you write everything in one place? How did you organize it?

Abhijith S Unni

- What specific problems faced by farmers does AgriGuru solve, and how did you identify these needs?
- How does your crop recommendation or yield prediction model work? What kind of dataset or algorithm did you use?
- Can you explain the system architecture of MediConnect and how you ensured scalability for future IoT features
- Healthcare requires security and privacy. What considerations or plans do you have to protect patient data?
- Was this project team-based? If yes, what roles did you take and how did you manage communication
